Professional Summary

QA Automation Engineer skilled in Playwright with JavaScript, test automation, and quality assurance. Proficient in designing and executing automated test cases and applying functional, regression, and API testing. Strong focus on delivering reliable, high-quality applications through efficient automation practices.

Experience

Freelance QA Automation Engineer

May 2024 – Present

- Automated end-to-end web application testing using Playwright with JavaScript, covering user workflows, UI validation, and cross-browser compatibility.
- Designed and executed functional, regression, and smoke test suites, improving overall test coverage and reducing release defects by 30%.
- Integrated automation scripts into CI/CD pipelines using Jenkins and GitHub Actions, enabling faster and continuous test execution with every build.
- Created and maintained detailed bug reports in JIRA, collaborated closely with developers, and ensured timely defect resolution during sprints.
- Optimized test scripts and reusable frameworks, improving test efficiency by 35% and reducing manual testing efforts significantly.

Projects

[Link](#)

Crime Report Management System (CRMS) (*Java, MySQL, Maven*)

- Developed UI and API automation using Playwright with JavaScript for critical modules: authentication, crime reporting, case management, analytics dashboard, and secure messaging.
- Implemented Black-Box, Grey-Box testing strategies for validating workflows and backend interactions.
- Configured CI via automation scripts to run tests on every build, reducing manual regression effort.

Art Finder – Web Application (*Django-based E-commerce*)

- Built a robust QA automation suite using Playwright with JavaScript to automate end-to-end flows such as user authentication, product search/filter, cart operations, and order placement.
- Designed and executed functional, regression, and smoke test cases, improving test coverage across customer, seller, and admin roles.

Medisys Pro – Medical Store Management (*Java, JSP, MySQL*)

- Automated key user workflows like login, inventory updates, sales, and report generation using Playwright with JavaScript injected into the web UI.
- Developed functional and regression test suites to validate role-based access and billing processes.
- Integrated automated runs into GitHub Actions or Jenkins, accelerating feedback on each code iteration.

Collage Website (*Responsive college site — HTML/CSS, Node.JS, Python*)

- Implemented Playwright JavaScript scripts to validate UI responsiveness across breakpoints, navigation, and content rendering.
- Executed cross-browser smoke tests (Chrome, Firefox, Edge) to ensure layout consistency.

Education

- | | |
|--|----------------------------|
| • D. Y. Patil Institute of MCA and Management, Akurdi. | May 2024 M.C.A (8.19 CGPA) |
| • Pacific University, Udaipur, Rajasthan | May 2021 B.C.A (7.78 CGPA) |
| • Sh. Parshawanath Sr. Sec. School, Varkana, Pali, Rajasthan | March 2018 HSC (67.40 %) |
| • Government Senior Secondary School, Chanchori, Pali, Rajasthan | March 2016 SSC (67.50 %) |

Technical Skills

Programming Languages: JavaScript (Playwright), Java, Python

Automation Tools: Playwright, Selenium WebDriver, TestNG, Postman

Frameworks & Libraries: Cucumber (BDD),

Databases: MySQL, MongoDB, Firebase

Tools & Technologies: JIRA, Git, GitHub, GitHub Actions

Testing Expertise: Functional Testing, Regression Testing, Smoke Testing, API Testing, CI/CD Automation

Certifications

[link](#)

- | | |
|---|---|
| 1. Google IT Professional Certification. | 5. Google Cyber Security |
| 2. Data Analytics Essentials Certification. | 6. Python Essentials 1 & 2 (Cisco) |
| 3. NASSCOM TruBot Designer. | 7. Selenium Testing (Great Learning) |
| 4. AWS by Data-Tech Lab. | 8. TCS iON Career Edge – Young Professional |

Additional Skills

- Strong analytical and problem-solving abilities with a focus on debugging and root cause analysis.
- Effective communication & collaboration within Agile/Scrum teams.
- Ability to write clear test documentation, reports, and defect logs.
- Continuous learning mindset, keeping up with modern automation tools and practices.

Workshop

3-Day Soft Skills & Industry Culture Workshop – DYPIMCAM

- Built essential workplace competencies: professional communication, time management, and collaboration.
- Gained insights into corporate culture, team dynamics, and professional behavior.
- Enhanced adaptability, conflict resolution, and interpersonal skills for client-facing roles.
